SUMMARY

I am a passionate and excited individual inspired to learn and deliver a positive outcome with my work, with an extensive variety of passions and a commitment to lifelong learning.

EXPERIENCE

Software Developer Intern

Mar 2025 – Jun 2025

Unity Labs AI

Hyderabad, IN

- Engineered a Premiere Pro Auto-Edit plugin from design to delivery, integrating UI, UX, and automation logic.
- Reduced multi-cam podcast editing time from 3 hours to under 8 minutes through timeline-aware intelligent cuts.
- Delivered a deployment-ready build binaries, optimized for stability, scalability, and professional-creator workflows.

Software Developer Intern

Jun 2024 – Feb 2025

Front Interactive Pvt. Ltd.

Hyderabad, IN

- Developed two production-grade internal applications end-to-end, delivering robust functionality and architecture.
- Collaborated with 10+ developers on feature integration, architectural design, and performance optimization.
- Authored concise technical documentation, enhancing onboarding efficiency and cross-team knowledge sharing.

EDUCATION

ACE Engineering College

Hyderabad, IN

B.Tech in Computer Science and Engineering

Nov 2022 – May 2026

Sri Chaitanya Junior College

Hyderabad, IN

Intermediate MPC

2020 – 2022

Johnson Grammar School ICSE & IB

Hyderabad, IN

High School

2019

SKILLS

Core Programming: Java, Python, C, JavaScript/TypeScript, Data Structures & Algorithms, SQL

Operating System: Linux, Windows

Technologies & Frameworks: Next.js, Node.js, Nest.js, React.js, React-Native/Expo, Express.js, Tailwind CSS, ShadCN, Socket.io, Framer Motion, Three.js/R3f, GSAP, AWS

Tools: Git/GitHub, Docker, VS Code, Postman, Figma, Agile, CI/CD, Debugging, Deployment

Systems: REST APIs, WebSockets, JWT Authentication, Prisma, PostgreSQL, MongoDB, Redis, Supabase, MySQL

PROJECTS

Trimly.ai | Next.js, LLaMA 3.2, Ollama, Node.js, pdf-parser | [GitHub](#)

May 2025 – Jun 2025

- Created an AI-powered tool that condensed PDFs and stories based on user time and mood preferences.
- Implemented semantic logic preserving 90% structure while shortening text by 80%, boosting readability.
- Delivered 5× faster content review, enhancing productivity for students and professionals.

Acethletics | Next.js, React Native, Node.js, MongoDB, Socket.io | [Live Demo](#)

Nov 2024 – Dec 2024

- Built a college sports management app supporting live match tracking and event coordination.
- Integrated WebSockets for real-time updates and developed an admin dashboard for 10+ sport events.
- Engaged 200+ players and garnered 2K+ downloads within launch week through interactive UI design.

QuickFuel | React.js, Node.js, MongoDB, Express.js, JWT, Socket.io | [Live Demo](#)

Jun 2024 – Jul 2024

- Designed an on-demand fuel and vehicle service web platform with GPS scheduling and order tracking.
- Structured a scalable backend architecture capable of handling high-traffic operations reliably.

AWARDS & ACHIEVEMENTS

- Led the **TEDxACEEC Web Dev Team**, developing and deploying the official event website for ticket and promotion management.
- Organized **Acethletics 2024**, coordinating 100+ participants across technical and creative divisions.
- Secured **Runner-Up** in **UiPath Hack-a-Bot 2023** for building an efficient and robust automation solution.
- Reached **Finalist** stage in **Yukti Innovation Challenge 2023** with an innovative startup concept.
