WORK EXPERIENCE

Software Developer Intern

Front Interactive

Jun 2024 - Feb 2025

- Developed 2 production-grade applications.
- Collaborated with the team to resolve software issues and bugs.
- Participated in code reviews and provided constructive feedback.
- Contributed to project planning and development cycles.

Software Developer Intern

Unity Labs AI

Mar 2025 - Jun 2025

- Developed Auto Edit tool
- Contributed to project planning and development cycles.

PROJECTS

QuickFuel

Jun 2024 - Jul 2024

Innovative On-Demand Fuel and Vehicle Service Platform

Tech Stack: React.js, Node.js, MongoDB, Express.js, JWT, Socket.io, Leaflet, Tailwind CSS

Key Features

- **Platform Development:** Created a platform for on-demand fuel delivery and vehicle repairs, removing the need for gas station visits.
- **Real-Time Tracking:** Implemented live tracking of orders.

ACETHLETICS

Nov 2024 - Dec 2024

All-in-one College Sports Website and App

Tech Stack: Next.js, Node.js, React Native, TypeScript, MongoDB, Express.js, JWT, Socket.io, Tailwind CSS, ShadCN

Key Features

- **Live Scores & Stats:** Real-time updates on matches and player performance.
- **Event Management:** Sports event scheduling, registration, and notifications.

Trimly.ai

May 2025 - Jun 2025

Read Smart, Read Less

Tech Stack: Next.js, Ollama, LLaMA 3.2, pdf-parser

Key Features

- **Time & Mood-Based Compression:** Allows users to select how much time they have and their reading mood, generating customized outputs that match their current needs.
- **Content-Preserving:** Compresses documents by retaining essential structure and meaning, instead of rewriting or summarizing like traditional LLMs.
