EXPERIENCE

Unity Labs AI

Mar 2025 - Jun 2025

Software Developer Intern

- Developed a Premiere Pro auto-edit plugin that cuts podcast editing time from 3 hours to under 8 minutes through audio signal analysis, dynamic scene switching, and handling overlaps.
- Delivered build binaries for release optimized for reliability and scalability for professional creators.

Front Interactive Pvt. Ltd.

Jun 2024 - Feb 2025

Software Developer Intern

- Developed production-level backend systems, providing robust APIs, and scalable architecture.
- Worked as part of an agile Scrum team, delivering features iteratively using Test-Driven Development.

PROJECTS

Atlas AI | *React Native, llama.cpp, Python, AsyncStorage, Zustand, RAG*

Offline Multi-Expert AI System with Edge Device Computation

- Developed an offline-first AI chat application with on-device inference capability that falls back to the desktop through LAN, utilizing SSE streaming.
- Maximized on-device efficiency to ensure proper functioning on mobile devices while considering computational and memory limitations.
- Enabled full-cycle on-device model management with inference optimization at the device level, combined with provider-specific local chat persistence.

Acethletics | *Next.js, React Native, Node.js, MongoDB, Socket.io*

Centralised Athletic Sports Platform

- Designed system architecture, API, and socket documentation, created schemas for data, and developed the app that was optimized for concurrency.
- Created WebSocket implementation for live streaming, used database transactions for atomicity of multi-step operations, and created standardized error handling and API responses.
- Used SOLID principles and followed the DRY, KISS, and YAGNI software development principles.

Trimly.ai | *Next.js, LLaMA 3.2, Ollama, Node.js, pdf-parser*

Intelligent semantic filtering tool

- Smartly filters content according to reading style, time and mood of users, from books and documents using LLMs.
- Built a processing pipeline that applies semantic logic to maintain up to 90% structural integrity with a reduction in size by 30-50% in length.
- Enables up to 5x faster content review and improving productivity for students and professionals.

SKILLS

- **Core Programming:** Java, Python, C, JavaScript, TypeScript, SQL
- **Technologies & Frameworks:** Next.js, Node.js, React.js, React Native, Express.js, Socket.io, GSAP, Three.js/R3F, WebSockets, JWT, REST, Prisma
- **Systems & Database:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools & Cloud:** Git, GitHub, Docker, AWS, CI/CD Pipelines, Postman, Figma, Supabase

EDUCATION

ACE Engineering College

Hyderabad, IN

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Nov 2022 - April 2026

EXTRA-CURRICULAR

- **TEDxACE Engineering College** - Co-Organizer managed speaker outreach, sponsorships, and event coordination.
- **AICTE** - Reached Finalist stage in Yukti Innovation Challenge 2023 with a innovative product idea.
- **Hackathon** - Runner-Up Secured in UiPath Hack-a-Bot 2023 for developing an effective and strong automation.
- **Certifications** - Cisco Python and CCNA, Smart Interviews Advanced DSA, Wipro Full-Stack Java
